Submission Information
Jurisdiction: WASHOE COUNTY
Name of individual completing survey and contact for questions (if different): DEANNA SPIKULA, REGISTRAR OF VOTERS, dspikula@washoecounty.us

Throughout the entire EAV survey there are tables that require you to report a total and then break it down into various sub-categories. Some of these totals break down vertically _and_ horizontally. To help you see the cells that should be totals I've colored the cells:

- Yellow – cell totals vertically (meaning the number in the yellow cell should equal the sum of all numbers below it)

- Blue – cell totals horizontally (meaning the number in the blue cell should equal the sum of all numbers to the right of it)

- Green – cell totals vertically _and_ horizontally (meaning the number in the green cell should equal the sum of all numbers below it _and_ to the right of it)

Section A: VOTER REGISTRATION

Per the Forms Marsh Group, since we now have same-day registration, _all of Section A_ should include data from the date range of **10/19/2018 – 11/3/2020**. Include EASE users who classified as "Nevada resident with a disability."

Please **DO NOT** include Individuals who registered to vote after the close of registration for the 2020 general election (7:00pm on 11/3/20) and were not eligible to vote in the election, or persons under the age of 18 registered under a pre-registration program.

A1. Total Number Registered and Eligible Persons, Active and Inactive

For question A1, report the total number of people (not votes or ballots) who were registered and eligible to vote in the November 2020 general election. The sum of active voters in A1b and inactive voters in A1c should equal the total number of registered voters reported in A1a.

[See next page]

Type of Registered Voter	Total
A1a. <u>TOTAL number of registered and eligible voters:</u> Do not include any persons under the age of 18 who may be registered under a pre-registration program or registered after the 2020 deadline for registration.	336,518
A1b. <u>TOTAL number of active voters:</u> Fully eligible voters who have no additional processing requirements to fulfill before voting.	308,363
A1c. <u>TOTAL number of inactive voters:</u> Voters who remain eligible to vote but require address verification under the provisions of the National Voter Registration Act.	28,155
A1 Comments:	

A2. Same Day Voter Registration

Include all same-day registrations, regardless of if the person's ballot counted or not. Break down the total by Early Voting and Election Day. For the sake of the EAV Survey, SDROs do not matter – an online registration during the 10/16/20 – 10/29/20 window was only truly a SDR if the person appeared during EV or ED and attempted to vote after using NOVA in that timeframe, and thus they would be counted as an EV or ED SDR.

Type of Same Day Registration	Total
A2a. <u>TOTAL same-day registrations received</u>	4,139
A2b. Same-day registrations received on Election Day	1,931
A2c. Same-day registrations received prior to Election Day (e.g., during early voting)	2,208
A2 Comments:	

A3. Total Registration Forms Processed: 2018 to 2020

For question A3a, report the total number of forms your jurisdiction received from all sources during the period from the close of registration for the November 2018 general election until the close of registration for the November 2020 general election (10/19/2018 – 11/3/2020) including SDRs. Include any forms that were processed, such as changes to name, party or address, duplicates, or pre-registrations. Break down the total (A3a) in A3b through A3g.

SDRs should also be included in the appropriate category (e.g., new valid registration or registration update). Include registrations for EASE users who classified as "Nevada resident with a disability."

[See next page]

Type of Registration Form Received	Total
A3a. <u>TOTAL registration forms received</u>: All registration forms received between the close of registration for the November 2018 general election and the close of registration for the November 2020 general election (**including** P-17s).	186,489
A3b. <u>New valid registrations</u> (**excluding** P-17s): All successful registrations that were not invalidated or rejected and did not duplicate or modify a previously existing registration in the jurisdiction.	87,484
A3c. <u>New pre-registrations of persons under age 18</u> (**all** P-17s received): All registrations submitted by persons under the age of 18 years so that they will be registered when they become of voting age.	2,824
A3d. <u>Duplicates of existing valid registrations</u>: Applications to register to vote submitted by persons already registered to vote at the same address, under the same name and personal information (meaning the person **didn't change anything**).	11,796
A3e. <u>Invalid or rejected (other than duplicates)</u>: Registrations that did not meet the requirements of eligibility because they were not completed properly or the individual was not eligible to register in a jurisdiction (applications that were voided for missing info or for being not eligible, such as a felon or someone who marked they were not a citizen, etc.).	13,229
A3f. <u>Registrations that **updated** an existing voter registration in your county</u>: Registrations that modified or edited voter information for individuals with current valid registrations. Include **ALL** updates to existing registrations: name, party, SSN, in-county residential address change, mailing address, email, phone, etc. – **any updates**).	71,156
A3g. <u>Address changes that cross jurisdiction borders</u>: (Not trackable?) Registrations that modified or edited the address of persons with current valid registrations, where the address change places them in a different jurisdiction (such as a different county) from their current registration.	N/A
A3h. <u>Other</u>: _____	
A3 Comments:	

A4–A7. Total Registration Forms Processed, by Source

For question A4, divide the total number of voter registration forms **reported in question A3a** according to source of the form. Then, for each source, divide the forms into the categories of new registrations (A5), duplicates of an existing registration (A6), and invalid or rejected registrations (A7). Include registrations from EASE users who classified as "Nevada resident with a disability."

Questions A6 and A7 are <u>mutually exclusive</u>—duplicate registrations included in A6 should not be included as invalid or rejected registrations in A7, and vice versa.

For items a–k, it is important to focus on the <u>mode used</u> to submit the registration application. These modes are intended to be mutually exclusive. EASE <u>is not</u> a mode of submission – ADA EASE users submitted their registration either by mail, email or fax (row a) or by appearing in person as a SDR (row j– Other). DO NOT enter extra things like "School" as a submission source – email Jacob if you feel such a need.

For A4c—A7c (registrations submitted via the internet), only include registration forms that were completed and submitted through an online voter registration system (meaning NOVA and DMV <u>online</u> transactions). A form that was filled out online but submitted via email or printed and mailed should be included in row a—"Individual voters submitting applications by mail, fax, or email."

Same-day registrations are considered a separate category and should be entered in row j- Other.

[See next page]

A4a through A4l: Divide the total number of all registration forms received (as reported in A3a) into the following sources.
A5a through A5l: Divide the total number of new registration forms received (as reported in A3b) into the following sources.
A6a through A6l: Divide the total number of duplicate registration forms received (as reported in A3d) into the following sources.
A7a through A7l: Divide the total number of invalid or rejected registration forms (as reported in A3e) received into the following sources.

	A4. Total forms received (from A3a)	A5. New registrations (from A3b)	A6. Duplicates of existing registrations (from A3d)	A7. Invalid or rejected (from A3e)
TOTAL	186,489	87,484	11,796	13,229
a. Individual voters submitting applications by mail, fax, or email	29,805	15,469	1,600	2,479
b. Individual voters registering in person at the election/registrar's office	8,607	4,373	371	1,273
c. Individual voters submitting forms via online registration systems (**NOVA and DMV Online**)	42,945	20,039	2,813	2,313
d. Motor vehicle offices or other offices that issue driver's licenses (this would include automatic registration)	77,262	32,672	5,795	2,983
e. Public assistance offices mandated as registration sites under NVRA	6,515	2,755	390	761
f. State-funded agencies primarily serving persons with disabilities	0	0	0	0
g. Armed forces recruitment offices	0	0	0	0
h. Other agencies designated by the state not mandated by NVRA	0	0	0	0
i. Registration drives from advocacy groups or political parties	17,216	8,607	697	3,420
j. Other: SDRs (new and updates)	4,139	3,569	130	
k. Other:				
A4–A7 Comments:				

Confirmation of Registration Notices and Removals: Questions A8 and A9

These questions ask about the total number of confirmation notices as defined under National Voter Registration Act (NVRA) Section 8 (d) (1) (B) and Section 8 (d) (2). Although NVRA distinguishes between "confirmation notices" and "removal notices," some jurisdictions refer to "confirmation notices" as "removal notices" or something else.

A8. Total Confirmation of Registration Notices Sent to Voters

For question A8a, report the total number of confirmation notices sent to voters in the period between the close of registration for the November 2018 general election and the close of registration for the November 2020 general election (10/19/2018 – 11/3/2020). Examples of situations where confirmation notices may be sent include an indication that the registrant no longer resides in the registrar's jurisdiction, or the voter has not voted or appeared to vote in a federal election during the period.

Next, for questions A8b–A8e, divide the total number of confirmation notices mailed (as reported in A8a) into the listed categories. Use item A8f for notices that cannot be placed into any of the categories specified in A8b–A8e. The amounts should sum to the total provided in A8a.

Type of Confirmation Notice	Total
A8a. TOTAL number of confirmation notices sent to registered voters: The total number of confirmation notices sent to voters during the time period between the close of registration for the November 2018 general election through the close of registration for the November 2020 general election. Include both the notices sent because there was an indication that the registrant no longer resides in the jurisdiction and the notices sent because the voter has not voted or attempted to vote during the two-year period.	72,599
A8b. Received back from voters confirming registration: The total number of notices returned that confirmed an individual was still eligible to vote in the jurisdiction.	40,403
A8c. Received back confirming registration should be invalidated: The total number of notices returned that confirmed an individual was no longer eligible to vote in the jurisdiction or no longer wanted to be registered to vote.	14,568
A8d. Returned back as undeliverable: The total number of notices returned by the post office because the U.S. Postal Service could not deliver the notice.	12,147
A8e. Status unknown (neither received confirmation nor returned undeliverable): Any notice that was sent to a voter but was not received back confirming registration (A8b), confirming invalidation (A8c), or returned as undeliverable (A8d).	5,481
A8f. Other: _____	
A8 Comments:	

For question A9a, report the total number of voters cancelled from the voter registration rolls in your jurisdiction in the period between the close of registration for the November 2018 general election and the close of registration for the November 2020 general election (10/19/2018 – 11/3/2020). Note that this question asks for those who were cancelled, not those moved to "inactive" status.

DO NOT include:

1. Duplicate Name Removed - removing/merging a duplicate record (i.e. 1 person has 2 records in your county).

2. Registered in Error - removing people who were not eligible and should not have been registered in the first place (i.e. noncitizens who somehow got registered but shouldn't have been, people who slipped through AVR even though they opted-out, etc.).

Next, for questions A9b–A9g, divide the total number of voters removed (as reported in A9a) into the categories listed below. The amounts should sum to the total provided in A9a.

Note: All of your cancellations should be categorized under A9b-g. If you feel you need to use A9h - Other, call or email Jacob first.

Reason for Cancellation	Total
A9a. TOTAL number of voters cancelled: Include only those completely removed from the list of registered voters, not records moved to an inactive list.	29,506
A9b. Moved outside jurisdiction	15,414
A9c. Death	4,796
A9d. Disqualifying felony conviction	420
A9e. Failure to respond to notice sent and failure to vote in two most recent federal elections	8,426
A9f. Declared mentally incompetent	27
A9g. Voter requested to be removed for reasons other than those listed above (This means a person just flat out asked to be removed, NOT a person informing you they've moved out of jurisdiction, died, etc.)	423
A9h. Other: _____	
A9i. Other: _____	
A9j. Other: _____	
A9 Comments:	

Section B: UNIFORMED AND OVERSEAS CITIZENS ABSENTEE VOTING ACT (UOCAVA)

The goal of Section B is to understand the voters covered under the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) in your jurisdiction. This section of the EAVS asks for five types of data:

1. How many individuals were registered and eligible to vote in 2020 as a UOCAVA voter?
2. How many Federal Post Card Applications (FPCA) were received by the election office, how many were accepted, and how many were rejected?
3. How many ballots were transmitted to and returned by UOCAVA voters?
4. How many ballots returned by UOCAVA voters were counted and how many were rejected?
5. How many Federal Write-in Absentee Ballots (FWAB) were received and how many were rejected or accepted?

Types of UOCAVA Voters

UOCAVA serves several populations of U.S. citizens. Below are the UOCAVA voter categories that are listed on the FPCA and how they correspond to the voter-type categories that are in this section of the survey:

Uniformed Services voters—domestic or foreign	I am a member of the Uniformed Services or Merchant Marine on active duty OR I am an eligible spouse or dependent
Non-military/civilian overseas voter	I am a U.S. citizen residing outside of the United States, and I intend to return I am a U.S. citizen residing outside of the United States, and my return is not certain I am a U.S. citizen and have never resided in the United States

DO NOT include EASE users who classified as "Nevada resident with a disability" in Section B.

Types of UOCAVA Absentee Ballots

Section B asks about two types of absentee ballots:

Transmitted ballots: These are ballots your office sent to voters, including ballots sent via postal mail, email, fax, or other modes.

Federal Write-in Absentee Ballots (FWAB): These are ballots that originated from UOCAVA voters who did not receive their requested absentee ballots in time. On the FWAB, the voter lists each office and either the candidate's name or party for whom the voter is casting a vote. FWABs should not be reported with transmitted UOCAVA absentee ballots, and are instead reported in questions B23-B27.

B1. Total Registered and Eligible UOCAVA Voters

For question B1a, report the total number of registered and eligible voters in your jurisdiction who were covered by UOCAVA in the November 2020 general election.

Category of UOCAVA Voters	Total
B1a. <u>TOTAL registered and eligible:</u> Report the total number of registered and eligible voters covered under UOCAVA for the November 2020 general election. Include active and inactive voters and any persons who might have registered as UOCAVA prior to or on Election Day. If the total number of registered and eligible voters who were covered by UOCAVA in the November 2020 general election in your jurisdiction is zero, report "0" for B1a.	1,515
B1b. <u>Uniformed Services voters (members of the Uniformed Services and their eligible dependents)—domestic or foreign</u>	350
B1c. <u>Non-military/civilian overseas voters</u>	1,165
B1 Comments:	

B2. Federal Post Card Applications Received

For B2a, report the total number of FPCAs received from UOCAVA voters for the November 2020 general election. **This includes voters who used EASE to fill out an FPCA** (but <u>do not</u> include EASE users who classified as "Nevada resident with a disability").

FPCAs Received from UOCAVA Voters	Total
B2a. <u>TOTAL Federal Post Card Applications (FPCA) from UOCAVA voters</u>: Include any ballot request for the November 2020 general election that originated from an FPCA, regardless of the year of submission. Only include FPCA requests; do not include absentee ballot requests that originated from a state absentee voter registration form or other source.	1,524
B2b. <u>Uniformed Services voters (members of the Uniformed Services and their eligible dependents)—domestic or foreign</u>	353
B2c. <u>Non-military/civilian overseas voters</u>	1,171
B2 Comments:	

B3. Federal Post Card Applications Rejected

For question B3a, report the total number of FPCAs rejected from UOCAVA voters. Rejection reasons might include missing information, lack of a signature, a missed deadline, or overall ineligibility. Keep in mind, FPCAs could be received all the way until 7:00pm on Election Day.

Reason for FPCA Rejection	Total
B3a. TOTAL REJECTED Federal Post Card Applications (FPCA) from all UOCAVA voters: Include any ballot request for the November 2020 general election that originated from an FPCA that was rejected, regardless of the year of submission. Only include FPCA requests; do not include absentee ballot requests that originated from a state absentee voter registration form or other source.	9
B3b. REJECTED FPCAs received from Uniformed Services voters (members of the Uniformed Services and their eligible dependents)—domestic or foreign	3
B3c. REJECTED FPCAs received from non-military/civilian overseas voters	6
B3 Comments:	

B4. Federal Post Card Applications Rejected Because Late

For question B4, report how many of the FPCAs rejected for the 2020 general election (as reported in B3a) were rejected because they were late. FPCAs should only be considered late if received after 7:00pm Election Day (because of SDR).

Reason for FPCA Rejection	Total
B4a. TOTAL FPCAs rejected because late: Of the total number of Federal Post Card Applications (FPCA) that were rejected (as reported in B3a), how many were rejected because they were received after the absentee ballot request deadline?	0
B4 Comments:	

UOCAVA Ballots Transmitted: Questions B5–B8

Transmitted ballots are any ballots that your office sent to UOCAVA voters, including ballots sent to voters via postal mail, email, fax, or other modes. **Do not** include FWABs or other ballots not transmitted from the election office to the voter.

B5–B8. UOCAVA Ballots Transmitted to Voters

For questions B6, B7, and B8, report how many UOCAVA absentee ballots your jurisdiction *transmitted* to UOCAVA voters via postal mail (B6), email (B7), and other modes, such as fax or online ballot delivery portals (B8). These questions refer to the way ballots were *sent* to voters, not the way ballots were *requested* or *returned*.

Note: EASE transmits (provides) UOCAVA ballots on your behalf – UOCAVA Ballots generated by EASE should be reported in Question B8 "other mode". <u>DO NOT</u> include ballots to EASE users who classified as "Nevada resident with a disability."

		Type of UOCAVA Voter	
	a. Total	b. Uniformed Services voters (members of the Uniformed Services and their eligible dependents)- domestic or foreign	c. Non-military/civilian overseas voters
B5. <u>TOTAL absentee ballots</u> <u>transmitted to UOCAVA voters</u>	1,515	350	1,165
B6. <u>Postal mail</u>: Report the total number transmitted by postal mail, using USPS or any private courier shipping services (e.g., FedEx, UPS, DHL).	66	48	18
B7. <u>Email</u>: Report the total number transmitted via email attachment from your office to voters.	1,427	285	1,142
B8. <u>Other mode</u>: Report the total number transmitted by other methods such as fax, online ballot delivery portals, etc. **(EASE)**	22	17	5
B5-B8 Comments:			

UOCAVA Ballots Returned: Questions B9–B13

B9–B12. Transmitted Ballots Returned by Voters: Postal Mail, Email, Other

For question B9, please report the total number of ballots that were returned by voters for the 2020 general election out of all UOCAVA ballots transmitted to voters (**as reported in B5a**).

Returned ballots include all ballots returned by the voter to the election office, regardless of whether or not those ballots are ultimately counted.

Please **EXCLUDE** Federal Write-In Absentee Ballots (FWABs) from your totals. You will report data on FWABs starting with question B23.

Note: **EASE is not a return method**. Ballots generated via EASE should be recorded by the method received by your office – postal mail (B10), email (B11), other (B12). <u>DO NOT</u> include ballots from EASE users who classified as "Nevada resident with a disability."

	Type of UOCAVA Voter		
	a. Total	b. Uniformed Services voters (members of the Uniformed Services and their eligible dependents)- domestic or foreign	c. Non military/civilian overseas voters
B9. TOTAL: Of all UOCAVA ballots transmitted to voters as reported in B5a, report the total number of ballots that were returned by voters to your office for the 2020 general election. Do not include FWABs in this number.	1,424	316	1,108
B10. Postal mail: Of all UOCAVA ballots received (B9a), report the total number that were returned by postal mail. This includes all ballots that your office received via the **USPS or private courier shipping** services (e.g., FedEx, UPS, DHL).	82	59	23
B11. Email: Of all UOCAVA ballots received (B9a), report the total number that were returned by email. This includes all ballots that you received via email attachment from a voter.	1,332	257	1,075
B12. Other mode: Of all UOCAVA ballots received (B9a), report the total number that were returned through other methods. This includes ballots received through all other modes, such as, fax, online systems, etc.	10	0	10
B9–B12 Comments:			

B13: Ballots Returned Undeliverable

For question B13, please report the total number of ballots that were returned as undeliverable by mode of transmission. This would include ballots returned by mail as undeliverable (B13b), ballots where the email to the voter bounced back and could not be used (B13c), and ballots undeliverable by other mode, such as a bad fax number (B13d). DO NOT include EASE users who classified as "Nevada resident with a disability."

	Mode of Transmission			
	a. Total	b. Postal mail undeliverable	c. Email undeliverable	d. Other mode undeliverable
B13. TOTAL ballots returned undeliverable: Ballots that were returned, regardless of the mode by which they were transmitted, and could not be delivered to the voter.	22	1	21	0
B13 Comments:				

UOCAVA Ballots Counted: Questions B14–B17

B14–B17. Transmitted Ballots Counted: Postal Mail, Email, Other

For question B14, please report, out of all UOCAVA ballots **returned** by voters (**as reported in B9a**), the total number of ballots that were counted by your office for the 2020 general election. Please **EXCLUDE** Federal Write-In Absentee Ballots (FWAB) from your totals. You will report data on FWABs starting with question B23.

Note: **EASE is not a return method.** Ballots generated via EASE should be recorded by the method returned to your office – postal mail (B15), email (B16), other (B17). DO NOT include ballots from EASE users who classified as "Nevada resident with a disability."

[See next page]

	Type of UOCAVA Voter		
Nevada 2020 EAV Survey	a. Total	b. Uniformed Services voters (members of the Uniformed Services and their eligible dependents)- domestic or foreign	c. Non-military/civilian overseas voters
B14. TOTAL: Of all UOCAVA ballots returned by voters as reported in B9a, report the total number of ballots that were counted by your office for the 2020 general election. Do not include FWABs in this number.	1,423	316	1,107
B15. Postal mail: Report the total number of UOCAVA ballots returned by postal mail that were counted by your office for the 2020 general election. This includes all ballots that your office received via the **USPS or private courier shipping services** (e.g., FedEx, UPS, BHL).	82	59	23
B16. Email: Report the total number of UOCAVA ballots returned by email that were counted by your office for the 2020 general election. This includes all ballots that you received via email attachment from a voter.	1,331	257	1,074
B17. Other mode: Report the total number of UOCAVA ballots returned through other methods that were counted by your office for the 2020 general election. This includes ballots received through all other modes, such as, fax, online systems, etc.	10	0	10
B14–B17 Comments:			

B18–22. Total Number of UOCAVA Ballots Rejected and Reasons for Rejection

For questions B18a–B18c, report the total number of transmitted UOCAVA ballots that were returned by voters and were rejected. Please **EXCLUDE** Federal Write-In Absentee Ballots (FWABs) from your totals. You will report data on FWABs starting with question B23.

DO NOT include ballots from EASE users who classified as "Nevada resident with a disability."

	Type of UOCAVA Voter		
	a. Total	b. Uniformed Services voters (members of the Uniformed Services and their eligible dependents)-domestic or foreign	c. Non-military/civilian overseas voters
B18. <u>TOTAL ballots rejected</u>: Rejected ballots include any ballots that were not counted. This might include ballots rejected because they were not completed properly, ballots received after the deadline for counting, ballots that lacked a postmark, or ballots submitted by individuals who were not eligible to vote in your jurisdiction.	1	0	1
B19. <u>Ballot not received on time/missed deadline</u>: Ballots that were not counted because they were received after the deadline for a ballot to be received for counting.	0	0	0
B20. <u>Problem with voter signature</u>: Ballots that were not counted because of an issue relating to the voter signature, including but not limited to a missing signature or a returned ballot signature not matching the signature on file.	1	0	1
B21. <u>Ballot lacked a postmark</u>: Ballots that were not counted because the ballot lacked the postmark required by your state or jurisdiction, despite being received before the deadline for being included for counting.	N/A	N/A	N/A
B22. <u>Other</u>: _____			
B18–B22 Comments:			

Federal Write-in Absentee Ballots: Questions B23–B27

B23–B27. Federal Write-in Absentee Ballots Received, Counted, and Rejected

For questions B23–B27, report the total number of Federal Write-In Absentee Ballots (FWABs) received, counted, and rejected from UOCAVA voters for the following groups.

	Type of UOCAVA Voter		
	a. TOTAL number of FWABs	b. Uniformed Services voters (members of the Uniformed Services and their eligible dependents)—domestic or foreign	c. Non-military/civilian overseas voters
B23. TOTAL number of FWABs returned by UOCAVA voters	49	20	29
B24. TOTAL number of FWABs counted	48	19	29
B25. Total number of FWABs rejected because it was received after the ballot receipt deadline: Of the total number of FWABs received and rejected, report the number of FWABs that were rejected or not counted because they were received after the state's deadline for receiving and accepting FWABs.	1	1	0
B26. Total number of FWABs rejected because the voter's regular absentee ballot was received and counted: Of the total number of FWABs received and rejected, report the number of FWABs that were rejected or not counted because the voter also returned an absentee ballot that you had transmitted to the voter.	0	0	0
B27. Total number of FWABs rejected for other reasons (please describe): _____			
B23–B27 Comments:			

Section C asks about by-mail voting, which includes all individuals who received a ballot from your office prior to Election Day by mail (**or via download from a web portal or by fax – this means ADA users on EASE**). It does not matter how the by-mail ballot was returned (via mail, dropped off at a polling place, or other designated method). Remember that Section C is about domestic by-mail voting, <u>not UOCAVA voting</u>.

Because we mailed all active registered voters in Nevada a mail ballot, there are three "types" of mail ballots in the 2020 General that will be reported on:

1. Mail-Only precincts – people who live in a mail-only precinct and voted a mail ballot
2. Permanent Absentee – people who had requested to be put on the permanent mail absentee list voted a mail ballot
3. All "other" mail ballots – these are all the people who voted a mail ballot only because AB4 required us to send them one; or voters who only requested to receive an absentee ballot for the General, or all of 2020, but not permanently (they don't live in a mail-only precinct and they didn't request a permanent absentee ballot); or Nevada residents with a disability who used EASE to mark a ballot
   a. Keep in mind an EASE ballot is an **absentee ballot**, regardless of how it was returned (mail, email or fax)

The Fors Marsh Group would like us to include all of the "other" mail ballots with the Permanent Absentee ballots.

This section of the EAVS asks for four types of data:

1. How many by-mail ballots were transmitted to voters in the 2020 general election?
2. How many by-mail ballots were transmitted to permanent by-mail voters in the 2020 general election?
3. How many by-mail ballots were accepted and how many by-mail ballots were rejected in the 2020 general election?
4. For what reasons were by-mail ballots rejected in the 2020 general election?

Note: The only question in Section C that you will <u>NOT</u> include the mail-only precinct voters in is C2.

Transmitted Civilian By-Mail Ballots: Questions C1–C2

<u>C1. Total By-Mail Ballots Transmitted</u>

For question C1, report the total number of domestic civilian by-mail ballots transmitted to voters for the November 2020 general election. Include <u>all</u> by-mail ballots transmitted for this election. Next, divide the total number of by-mail ballots transmitted to voters (as reported in C1a) into the categories listed in C1b through C1f. Use C1g for any by-mail ballots that do not fit into the categories listed. The numbers entered in C1b through C1f should sum to the total provided in C1a.

[See next page]

Category of By-Mail Ballots	Total
C1a. <u>TOTAL domestic by-mail ballots transmitted</u>: This number should include all by-mail ballots transmitted to non-UOCAVA voters before Election Day, **including spoiled or replaced ballots**. Include ADA EASE ballots, mail-only precincts, permanent absentee and the "other" mail ballots. (This is the only question on the survey where you can have a higher number than your number of registered voters.)	307,044
C1b. <u>Returned by voters</u> (including ballots both counted and rejected): This **DOES NOT** include spoiled or surrendered ballots – those are reported in C1d. The number you record here should equal the sum of C3a (returned ballots counted) + C4a (returned ballots rejected).	132,016
C1c. <u>Returned as undeliverable</u>: Report the total number of transmitted ballots returned to your office as undeliverable. Here, undeliverable ballots would be ballots returned by the U.S. Postal Service.	13,575
C1d. <u>Surrendered, spoiled or replaced ballots</u> (also referred to as "voided" ballots): This category includes a by-mail voter who surrenders his or her by-mail ballot at a polling place in order to vote in person. It also includes ballots that were incorrectly marked or impaired in some way; a replacement ballot may be issued so that the voter can correctly mark the ballot.	99,179
C1e. <u>By-mail voters who voted in person with a provisional ballot</u>: In states with by-mail voting, some by-mail voters decide to vote in person on Election Day. If the by-mail voter surrenders his or her by-mail ballot at the polls to vote in person using the regular voting process, the by-mail ballot is considered spoiled and should be included in C1d. However, some by-mail voters do not bring their ballot to the polls on Election Day and must vote with a provisional ballot. Please record these voters in C1e. If your state categorizes these voters as having spoiled their by-mail ballots, please note this in the C1 Comments box.	N/A
C1f. <u>Status unknown</u> (neither returned undeliverable nor returned from voter): This category would include all transmitted by-mail ballots that were not returned by voter, spoiled, returned as undeliverable, or otherwise unable to be tracked by your office (there should only be a few of these).	62,274
C1g. <u>Other</u>: _____	
C1 Comments:	

C2. Ballots Sent to Permanent Absentee Voters

For question C2a, report the total number of ballots that were transmitted to **permanent absentee** voters in your jurisdiction. Do not include ballots transmitted in mail-only precincts (this is the only question in Section C that you will **NOT** include the mail-only precinct voters). **DO NOT** include EASE ballots or all the "other" mail ballots. This is strictly asking for how many permanent absentee ballots were sent.

	Total
C2a.<u>TOTAL number of domestic civilian by-mail ballots transmitted to voters on a permanent absentee ballot voter registration list.</u> (Do not include all the "other" mail ballots.)	17,718
C2 Comments:	

Returned and Rejected Ballots: Questions C3–C4

The number of mail ballots in C3a (counted) and the number of mail ballots in C4a (rejected) should sum to equal the number of mail ballots returned (reported in C1b).

C3. Total Number of By-Mail Ballots Returned and Counted

For question C3, report the total number of by-mail ballots returned and counted.

	Total
C3a. TOTAL returned and <u>counted</u>: Ballots that were processed, counted, and included in the canvas of election results. (Include all types of non-UOCAVA mail ballots.)	130,770
C3 Comments:	

C4. Number of By-Mail Ballots Rejected, by Reason Rejected

For question C4, provide the total number of domestic civilian by-mail ballots rejected, and then divide these into the following categories indicating the reason why the by-mail ballots were rejected.

Category of By-Mail Ballots	Total
C4a. TOTAL number of domestic civilian by-mail ballots rejected	1,246
C4b. Ballot not received on time/missed deadline	152
C4c. No voter signature	165
C4d. No witness signature	N/A
C4e. Non-matching signature	776
C4f. No election official's signature on ballot	N/A
C4g. Ballot returned in an unofficial envelope	7
C4h. Ballot missing from envelope	10
C4i. Envelope not sealed	0
C4j. No resident address on envelope	0
C4k. Multiple ballots returned in one envelope	2
C4l. Voter deceased	17
C4m. Voter already voted in person	54
C4n. First-time voter without proper identification	25
C4o. No ballot application on record	
C4p. Other: Identifying marks on ballot	38
C4 Comments:	

The goal of Section D is to understand in-person voting and polling operations in your jurisdiction. This section of the EAVS asks for four types of data:

1. How many people voted in person—either on Election Day or during in-person early voting (including in-person absentee voting)—in 2020?
2. How many precincts did you have in your jurisdiction for the 2020 general election?
3. How many polling places—for Election Day voting and in-person early voting—did your jurisdiction have for the 2020 general election?
4. How many poll workers—for Election Day voting and in-person early voting—did your jurisdiction have for the 2020 general election, and other data related to poll workers?

Total In-Person Voting: Question D1

D1. Total In-Person Voting

For question D1, report the total number of people in your jurisdiction who voted either at a physical polling location on Election Day or voted at a physical polling location during early voting. **DO NOT** include SDRs – these will be reported in Section E and question F1e.

Category of Ballots	Total
D1a. <u>Voted at a physical polling place on Election Day:</u> This category includes all individuals who cast a ballot at a physical location on Election Day, regardless of whether their ballots were ultimately counted or rejected (**not including <u>any</u> provisional ballots or absentee ballots dropped off at the polls**).	24,702
D1b. <u>Voted at an early vote location:</u> This category includes all individuals who cast a ballot at a physical location before Election Day, regardless of whether their ballots were ultimately counted or rejected (**not including <u>any</u> provisional ballots or absentee ballots dropped off at the polls**).	95,500
D1 Comments:	

Precincts and Polling Places: Questions D2–D4

D2. Total Number of Precincts

For question D2a, report the total number of precincts in your jurisdiction for the November 2020 general election.

Type of Registration	Total
D2a. <u>TOTAL number of precincts in your jurisdiction for the November 2020 general election</u>	557
D2 Comments:	

D3–D4. Total Number of Physical Polling Places (Election Day and Early Voting)

For questions D3a and D4a, report the total number of physical polling places in your jurisdiction for Election Day voting (D3) and for early voting (D4) for the November 2020 general election. If a single location was used for both early voting and Election Day voting, **please include it in both counts**.

For questions D3b and D3c and D4b through D4c, separate Election Day polling locations into two categories:

- Physical polling places that are not a part of the election office (D3b and D4b), and
- Polling places that are a part of the election office (D3c and D4c).

If your jurisdiction has two precincts in one location, such as a school gym, this is only one polling place (even if they are far apart in the gym). However, if your jurisdiction has a polling place at a school in the library and then has another polling place at the same school but it is in the gym, that would constitute two polling places. If your jurisdiction allows any individuals to cast a ballot in person at the local election office, please note these jurisdictions in D3c and D4c.

Category of Polling Place	D3. Election Day voting	D4. Early voting
a. <u>TOTAL</u>	45	30
b. <u>Physical polling places other than election offices</u> (e.g., libraries, schools, mobile voting location, **vote centers**)	44	29
c. <u>Election offices</u>	1	1
D3–D4 Comments:		

Poll Workers: Questions D5–D7

The EAVS asks about the number of poll workers who served in the 2020 general election. Here, "poll worker" refers to a person who verifies the identity of a voter; assists the voter with signing the register, affidavits, or other documents required to cast a ballot; assists the voter by providing the voter with a ballot or setting up the voting machine for the voter; and serves other functions as dictated by state law.

Your count of poll workers should not include poll observers, regular office staff who did not serve poll worker functions during the election, or temporary election staff not hired specifically to serve voters in either early or Election Day voting. (Basically, do not count people unless they were physically at the polling locations assisting voters somehow).

D5–D6. Total Number of Poll Workers

For questions D5 and D6, report the total number of poll workers used in your jurisdiction for the November 2020 general election. For question D5, report the total number of poll workers who worked Election Day voting. For question D6, report the total number of poll workers who worked in- person early voting (counting each poll worker only once, regardless of the number of shifts they worked). <u>If a poll worker worked as a poll worker for Election Day and during early voting, the poll worker would be counted **both** under Election Day and early voting.</u>

	D5. Election Day voting	D6. Early voting
a. <u>TOTAL number of poll workers</u>	558	328
D5–D6 Comments:		

D7. Age of Poll Workers

If your jurisdiction has data on the ages of its poll workers report the total number of poll workers in each age category. In this question, each poll worker should only be counted once, regardless of the number of shifts they worked.

Age of Poll Workers	Total
D7a. TOTAL number of poll workers	886
D7b. Under 18 years old	42
D7c. 18 to 25	187
D7d. 26 to 40	228
D7e. 41 to 60	234
D7f. 61 to 70	137
D7g. 71 years old and over	58
D7 Comments:	

D8. Ease of Recruiting Poll Workers

How difficult or easy was it for your jurisdiction to obtain a sufficient number of poll workers for the November 2020 general election? Please select one option.

- o Very difficult
- o Somewhat difficult
- o Neither difficult nor easy
- o Somewhat easy
- o Very easy
- o -Not enough information to answer

> D8 Comments:

SECTION E: PROVISIONAL BALLOTS

Historically this section has only ever included the HAVA provisional ballots; however, the Fors Marsh Group would like us to **include the Same-day Registration provisional ballots as well.**

Section E will be completed for you by Jacob (...dignified applause). **Thank you Jacob!!!!**

SECTION F: VOTER PARTICIPATION AND ELECTION TECHNOLOGIES

The goal of Section F is to calculate the number of individuals who participated in the 2020 general election and identify the type of voting technologies that were used in your jurisdiction.

Questions F1 and F2

The purposes of the following two questions are to determine the total number of voters who cast a ballot **that was counted** in the 2020 general election, and to determine the source of the data reported. This includes all voters whose ballots **were counted**, regardless of vote mode, in the election. **Include all voters** (e.g., both civilian and military by-mail voters) and all types of ballots (in person, by mail, provisional).

F1. Total Participation in the 2020 Election

For question F1, please provide the total number of voters who cast a ballot **that was counted** in the 2020 election, by mode of voting.

Type of Participants	Total
F1a. TOTAL number of voters who cast a ballot **that was counted**: All voters who voted in the election, including all categories of voters listed below. (This number should match your canvass and the ENR site).	252,563
F1b. Voters who cast a ballot at a physical polling place on Election Day, and whose ballots were counted: All voters who cast ballots in person on Election Day, not including provisional ballots or mail ballots dropped off at the polls. **DO NOT include SDR provisional ballots.** DO NOT include voters who dropped off a voted mail ballot.	22,796
F1c. UOCAVA voters who cast a ballot via absentee or FWAB, and whose ballots were counted: All voters who are covered by the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA) and who used either a transmitted absentee ballot or a Federal Write-in Absentee Ballot (FWAB). This includes UOCAVA EASE ballots.	1,471
F1d. Voters who cast a domestic civilian by-mail ballot, and whose ballots were counted: All voters who voted using a by-mail absentee ballot. Include permanent absentee ballots and all the "other" mail ballots. **DO NOT** include voters who live in mail-only precincts; those voters are reported in F1g.	n/a
F1e. Voters who cast a provisional ballot, and whose ballots were counted: All voters who cast a provisional ballot that was counted, either partially or in full. **Include all HAVA and SDR provisional ballots that counted.** (This number should match your Provisional Ballot Report submitted to Jacob.)	4,179
F1f. Voters who cast a ballot at an in-person early voting location, and whose ballots were counted: All voters who participated in the election in person prior to Election Day. This includes in-person early voting or in-person absentee voting. **DO NOT include SDR provisional ballots.**	93,347
F1g. Voters who cast a by-mail ballot in a **mail-only precinct**, and whose ballots were counted: All voters who cast ballots in a jurisdiction that uses an all-vote-by-mail system (i.e. sends a mail ballot to every registered voter). This should not include voters who used a domestic civilian by-mail ballot; those voters are reported in F1d. **DO NOT include permanent absentee ballots or the "other" mail ballots.**	130,770
F1h. Other: _____	
F1 Comments:	

F2. Source of Data on Total Participation in the 2020 Election

For question F2, indicate the source that was used for the total number of participants entered in question F1. **Select only one source** (highlight it or something). Considering F1 asks how many ballots were counted I'm pretty sure the only plausible answer is option 2 below; maybe 3, but certainly not option 4, and option 1 seems too exclusive.

1. Poll books and number of by-mail/provisional participants: Number of voters checked off by poll workers or who signed poll books at physical polling places plus the number of UOCAVA and other by-mail or early voters.
2. ==Number of ballots counted: Participation is based on the number of ballots counted at precincts and/or at a central location (including UOCAVA and other by-mail or early vote ballots).==
3. Vote history: Participation is based on the number of voters generated after "vote history" has been added.
4. Votes cast: Participation is based on the number of votes cast for the highest office on the ballot.
5. Other (please specify): _____

F2 Comments:

Poll Books: Questions F3–F4

F3–F4. Use of Electronic and Paper Poll Books

For questions F3 and F4, indicate whether your jurisdiction used electronic poll books or printed, paper poll books in polling places in the November 2020 general election for the listed activities. For each item below (a, b, c, and d), did your jurisdiction use electronic poll books/electronic lists of voters or traditional paper poll books at polling places for the following functions in the November 2020 general election?

Use of Poll Books	F3. Electronic Poll Book	F4. Paper Poll Book
a. Sign voters in	o **Yes** o No	o Yes o No
b. Update voter history	o **Yes** o No	o Yes o No
c. Look up polling places	o **Yes** o No	o Yes o No
d. Other	o Yes o No	o Yes o No
F3–F4 Comments:		

Voting Technologies: Questions F5–F11

F5–F11. Voting Equipment Used

For questions F5–F11, report the number and type of voting equipment used for each aspect of the election process in the November 2020 general election. Report the following information:

- Equipment type—please note whether your jurisdiction uses:
    - Direct-Recording Electronic (DRE), equipped with a voter-verified paper audit trail (VVPAT)
    - Electronic system that produces a paper record but does not tabulate votes (often referred to as a "ballot marking device")
    - Scanner (optical/digital) that tabulates paper records that voters mark by hand or via a ballot marking device
- Make and model of the voting equipment used (e.g., the ES&S ExpressVote® or the Dominion ImageCast®Evolution/ICE). There is space provided to list up to three makes and models for each equipment type.
- The number of machines deployed
- Equipment uses—indicate whether each type of equipment was used for:
    - In-precinct Election Day regular balloting
    - Special device accessible to voters with a disability
    - Provisional ballot voting
    - In-person early voting
    - By-mail ballot counting

Provide any comments about the nuances of your jurisdiction's use of voting equipment, or record information about additional voting equipment in use, in the F5-F11 Comments box.

[See next page]

	a. In Use in Your Jurisdiction	b. Make/Model	c. Number Deployed	d. Equipment Use (Select All that Apply)
F6. DRE machines w/ VVPAT	○ **Yes** ○ No	Dominion ICX Prime	1,140	☐ **In-precinct Election Day regular balloting** ☐ **Special device accessible to voters with a disability** ☐ **Provisional ballot voting (HAVA <u>and</u> SDR provisionals)** ☐ **In-person early voting**
		VVPAT	1,129	
F7. Ballot marking device	○ Yes ○ No			☐ In-precinct Election Day regular balloting ☐ Special device accessible to voters with a disability ☐ Provisional ballot voting (HAVA <u>and</u> SDR provisionals) ☐ In-person early voting ☐ By-mail ballot counting
F8. Scanner	○ **Yes** ○ No	Dominion ICC (Image Cast Central)		☐ In-precinct Election Day regular balloting ☐ Special device accessible to voters with a disability ☐ Provisional ballot voting ☐ In-person early voting ☐ **By-mail ballot counting**

Location of Vote Tally: Question F12

F12. Location for Where Votes are Tallied

For each of the following uses of your jurisdiction's voting equipment, report where the votes are tallied. (Everyone's answers should be "Central location" for 12a-e.)

Location of Vote Tally for:	Please Select One
F12a. In-precinct Election Day regular ballot voting:	☐ Central location ☐ Precinct or polling location ☐ Both central and precinct location ☐ Does not apply ☐ Data not available
F12b. Special devices accessible to disabled voters:	☐ Central location ☐ Precinct or polling location ☐ Both central and precinct location ☐ Does not apply ☐ Data not available
F12c. Provisional ballot voting:	☐ Central location ☐ Precinct or polling location ☐ Both central and precinct location ☐ Does not apply ☐ Data not available
F12d. In-person early voting:	☐ Central location ☐ Precinct or polling location ☐ Both central and precinct location ☐ Does not apply ☐ Data not available
F12e. By-mail balloting:	☐ Central location ☐ Precinct or polling location ☐ Both central and precinct location ☐ Does not apply ☐ Data not available
